PERSONAL SUMMARY

Business Analyst with 6+ years of experience in software delivery and 4+ years in a dedicated BA role. Strong in requirement analysis, agile delivery, and cross-functional collaboration. As well as experienced in API-based systems, complex business processes, and building scalable, maintainable solutions.

WORKING EXPERIENCE

NASHTECH | 2022 - Current

Business Analyst

- Worked directly with clients and internal teams to understand business needs and system expectations.
- Collected, clarified, and documented requirements in different formats such as BRS, SRS, user stories, and use cases, depending on the project context.
- Spent a large part of the time discussing requirements with developers to make sure everyone had the same understanding before implementation.
- Supported project planning activities by helping with scope clarification, effort estimation, and backlog preparation.
- Acted as a contact point between onshore stakeholders and offshore delivery teams when questions or changes came up.
- Worked with QCs to verify the implemented features matched the agreed requirements, and supported UAT/PRE-PROD when needed.
- Handled requirement changes during development and helped keep documentation and backlogs up to date.
- Took part in sprint ceremonies and regular project meetings, providing clarification and follow-ups when issues were raised.
- Supported presales and bidding activities by contributing to requirement understanding, solution discussions, and estimation inputs.
- Took part in internal training activities and acted as a mentor for junior team members, supporting them through project onboarding and day-to-day work.

FPT Software | 2021 - 2022

Project Manager

- Managed software projects from planning through delivery, working closely with clients and internal teams.
- Prepared project plans based on agreed scope and requirements, and tracked progress, cost, and quality during execution.
- Acted as the main contact point for clients, handling regular communication, updates, and follow-up discussions.
- Coordinated with team members to make sure tasks were clear, deadlines were realistic, and issues were addressed early.
- Monitored project risks and dependencies, raised concerns when needed, and worked with stakeholders to find practical solutions.
- Used Jira and related tools to track project activities, delivery status, and changes.
- Supported the team during sprint activities, helped remove blockers, and followed up on action items.
- Reported project status to management and clients, including delivery progress and potential risks.
- Worked closely with team members to maintain delivery quality and ensure agreed deliverables were released on time.

Monstar Lab Viet Nam | 2019 - 2021

Quality Control Engineer

- Reviewed and analyzed software requirements to understand business flows and expected system behavior.
- Created test plans and test cases based on SRS and project documentation.
- Executed manual testing for web and mobile applications, including functional, system, and regression testing.
- Performed API testing and basic SQL checks to verify data accuracy and system behavior.
- Logged, tracked, and followed up on defects, working closely with developers to clarify issues and retest fixes.
- Took part in sprint activities and project meetings to stay aligned with development progress and changes.
- Supported requirement clarification and Q&A during development and testing phases.
- Worked with project managers to stay aligned on testing scope, priorities, and delivery timelines.

PROJECT PARTICIPATED IN

Project: DULUX TRADE (Current)

Role: Business Analyst

Project Description: Dulux Trade is a B2B e-commerce platform designed to support trading activities between businesses, enabling trade customers to browse products, place and manage orders, and access trade-specific pricing and promotions.

The platform integrates with enterprise systems to support pricing, payment, stock, POS, loyalty, order management... workflows, while ensuring scalability and reliability for large-volume trade transactions.

- Led end-to-end requirement activities for multiple functional areas, from initial discovery to delivery and post-release clarification.
- Facilitated requirement workshops with onshore stakeholders to deep-dive into business processes, trade workflows, and system constraints.
- Analysed existing business flows and identified gaps, edge cases, and improvement opportunities before proposing system solutions.
- Produced and maintained key BA artifacts including BRD, SRS, user stories, use case details, wireframes, and process diagrams where needed.
- Acted as the primary bridge between business stakeholders and offshore delivery teams, ensuring shared understanding of requirements and priorities.
- Worked closely with developers to clarify functional logic, data flows, and integration points during implementation.
- Supported QA activities by reviewing test cases, validating scenarios, and tracing requirements to implementation results.
- Managed requirement changes throughout the project lifecycle, assessing impact on scope, timeline, and delivery risks.
- Worked in a rotational and cross-functional capacity based on incoming business requirements, particularly those related to SAP ecosystems.
- Analyzed and designed data integration models involving SAP ECC, SAP CPI (SCPI) and other enterprise systems.
- Performed data mapping and transformation analysis for data transferred across multiple Dulux platforms, ensuring consistency and integrity between source and target systems.
- Collaborated with teams to integrate and work with new microservices within the Dulux ecosystem, including OneTrust, Contentful, Simplicity, and other internal services.
- Acted as a bridge between business, SAP teams, and microservice teams, translating business requirements into clear functional and data-level specifications

---

Project: BonBon (Generative AI Chatbot)

Role: Business Analyst

Project Description: BonBon is an internal generative AI chatbot developed to support Vietnamese enterprises by providing automated responses, knowledge retrieval, and workflow assistance. The solution aimed to improve information access and reduce manual support effort through a centralized conversational interface.

Responsibility:

- Gathered and clarified business requirements for an internal generative AI chatbot solution
- Defined use cases, user stories, and conversation flows based on business scenarios
- Participated in prompt design and training activities to improve chatbot response quality and relevance
- Performed chatbot testing and validation, focusing on response accuracy, consistency, and business correctness.
- Worked with stakeholders to analyze incorrect or low-confidence responses and support iterative improvements to bot behavior
- Collaborated closely with onshore teams to review chatbot performance metrics and identify enhancement opportunities
- Supported backlog grooming, sprint planning, and feature refinement for continuous chatbot upgrades.

SKILLS

Business Analysis

- Requirement elicitation & analysis
- User stories, SRS, functional specifications
- Process modeling & data flow analysis
- Stakeholder management (onshore & offshore)

Domain & Platforms

- E-commerce & B2B trading platforms
- Enterprise systems with multiple integrations
- Salesforce-based business processes
- RPA for operational process automation

Integration & Architecture Exposure

- API-based integrations between platforms
- Data mapping & data flow analysis
- Working with SAP-related integrations (ECC, CPI/SCPI)
- Supporting microservices-based systems

Delivery & Ways of Working

- Agile / Scrum delivery
- Backlog refinement & sprint planning
- Requirement clarification during development
- UAT support and release validation

Tools & Documentation

- Jira, Confluence
- SQL for data validation
- Functional specs, user stories, flow diagrams

EDUCATION

Bachelor of Information Technology

Duy Tan University - 2020

Master of Management Information Systems (MIS)

Banking Academy of Vietnam - *In progress, expected 2027*

CERTIFICATE/EXAM

VSTEP English Proficiency – Level B2 | 2025

Microsoft Certified: Azure AI Fundamentals | 2025
